

Brotherhood Lyrics – MLM

I want to talk about my brother real quick
I'd tell I love em, but that ain't do the trick
Besides I'm way to scared for it
Making a plan, but anxiety comes up and I quit, it makes me sick
I want to connect more with my brothers and figured
That because we don't talk much our relationship suffers
I remember strong the moments where the room get's filled up with our laughters

Even my third year in highschool german teacher
Was telling me to hold our brothers close and that's what I chose but I do not know
How to start telling them they are the ones who are making me feel like home
I know it's hard to get close when I keep my distance
Hardly listen yeah but I'm really missing the both of you
And I know that talking about emotions is something we hardly do
But that's the point I want to get to cause
I want you guys not just to be my family but feel like it too

I'm scared to death to see us fall apart
Mostly because of my entire life the both of you've always been part yeah
The both of you were there from the start and believe me
When I'm telling you guys this from the bottom of my heart

I don't want to lose the people who I look up the most
I hope how much I really care about you guys now shows
Yeah this ain't a show I've been crying in the car wishing you guys were close
You guys ain't just part of my life but part of my home
I wished I had earlier picked up the phone dailing your numbers hell I am nervous
Our past has been written in stone but I want to change our future cause
As my brothers you guys are perfect
You guys can't be replaced by another you guys can't be replaced by a lover

I guess all I'm trying to say is that I love the both of you forever

I remember the times that we were younger

I would fight with one of my brothers the one that was younger

In the mean while the other would be calling my back

Convincing me at soccer to stay and not be so mad

I left it like that but now looking back

The reason I was a good goalkeeper one of the best

Was because both them pushed me that is why I was better than the rest

And how could I not be? Got an example for socialising

At home they would be challenging my intelligence

And even though I was always wrong they showed me how to stay strong

Loyal committed could give you a list but it would go on and on

Lesson taught from this song? A pair like my brothers there is only one

I'm scared to death to see us fall apart

Mostly because of my entire life the both of you've always been part yeah

The both of you were there from the start and believe me

When I'm telling you guys this from the bottom of my heart

I don't want to lose the people who I look up the most

I hope how much I really care about you guys now shows

Yeah this ain't a show I've been crying in the car wishing you guys were close

You guys ain't just part of my life but part of my home

Yeah part of my home!
